

# SureSill™ HeadFlash-Flex™

Flexible Head Flashing  
for Arched Doors and Windows

**FLEX SOME MUSCLE**  
against water intrusion  
on round windows,  
including mullions!

**Continuous  
upper edge**

# SureSill™ HeadFlash™

Rigid Head Flashing  
for Doors and Windows

**SureSill™ HeadFlash™**  
Provides a recessed slope and End  
Dams to help eliminate water intrusion  
and corner dribbling at the top of  
doors and windows.

## SureSill™ HeadFlash™

A slope and a small gap  
allow free drainage while End  
Dams prevent corner dribbling.

## SureSill™ Sloped Sill Pan™

### SureSill™ Sloped Sill Pan™

Helps prevent water and air from entering  
into a building. Engineered end caps for  
easy alignment and assembly.

1. Seal against water and air infiltration  
between the pan and rough opening.
2. Seal against water and air infiltration  
between the sill and the pan.
3. Weep hole openings for drainage

# SureSill™ Sloped Sill Pan™

for Doors and Windows  
Continuous Support and  
Positive Slope to Exterior

**SureSill™ Sloped Sill Pan™**  
Provides a level surface for continuous  
support of doors and windows and a  
slope for draining water to exterior.

## Sloped Sill Pan™ 11X™

### One Sill Pan - Eleven Frame Sizes

Frame Sizes from 3-1/4" to 7-1/4"
